QUILT ACTIVITY (AGE 5+)

Now that your child has learned all about quilting, they can practice their geometry skills with this matching activity, using the Bursting Star quilt pattern.

1. Print this document and cut out the shapes of the SECOND page by cutting along the black lines. Mix up the shapes in a pile.
2. Have your child arrange them together by pairing the matching shapes next to one another, on top of the Bursting Star pattern on this page as a guide. For younger children, we recommend parents or guardians work together with them.
3. When complete, have your child make sure all sides are matched to the corresponding shape.
